

MEDIA RELEASE

02.11.2021

KRAFTANLAGEN GROUP BECOMES KRAFTANLAGEN ENERGIES & SERVICES

As of 2 November 2021, Kraftanlagen München GmbH will have a new logo. The Kraftanlagen Group will become Kraftanlagen Energies & Services. In this context, Kraftanlagen München GmbH will change its name to Kraftanlagen Energies & Services GmbH.

With this change we are expressing four central characteristics:

"One Kraftanlagen"

We are a strong group in which our teams throughout Europe work together with our customers to find the best solutions for their challenges: energy transition, digital transformation, services. Nothing changes for our customers. We will remain at all our locations and you will retain your reliable and competent contact persons on site.

Kraftanlagen is part of a strong organisation.

There is a lot of power in us. As a medium-sized company, we are part of the Bouygues Energies & Services division, a global player and market leader in the fields of energy, digital and industrial transformation (22,000 employees within four major entities – Kraftanlagen Energies & Services in Germany, Romania and Austria; Bouygues Energies & Services in France, United Kingdom, Italy, and Switzerland; Plan Group in Canada; Axione in France and in the UK). We continue to grow together with Bouygues Construction, exploiting synergies, sharing innovations and tackling projects and

initiatives together. We also demonstrate this with our new name "Kraftanlagen Energies & Services" and our logo in the common colours.

"Together Further" – our performance promise to you

We work as a team with our customers. We take care of the construction and maintenance of their most important assets. We make sure that tomorrow's most important resources energy, data, services and people flow more efficiently.

Kraftanlagen know-how for more climate protection

We are committed to the energy transition with further decarbonisation solutions: by expanding renewable energy and energy storage, by promoting low-carbon industrial processes, by constructing energy-efficient buildings and by supporting sustainable communities.

"Beyond our ongoing activities for our customers, we are also pleased to make Kraftanlagen's new direction visible with our logo. We continue to stand for the highest level of performance and quality, coupled with a stronger organisation, focused on the challenges facing our customers and our society in the energy transition, digital transformation and services," says Stéphane Stoll, CEO Kraftanlagen Group.

Kraftanlagen Energies & Services – Solutions for the future

Kraftanlagen Energies & Services is part of the French construction group Bouygues Construction. As a versatile partner for energy, industry and building technology, the company is shaping the future of our society. With modern plant technology and flexible solutions, Kraftanlagen makes an important contribution to the energy transition and climate protection. In the process, it covers the entire value chain. The company is committed to sustainable projects and innovations that make our lives easier and more worth living. With its companies and holdings at numerous locations, Kraftanlagen offers an extensive service network with over 2,000 employees and carries out large-scale projects as a general contractor as well as individual trades in the following sectors: Energy, Industry, Building Technology, Nuclear and Manufacturing.
